[illegible] RUE KELLER:

On thursday,October 5 th,a squadron of mercenaries was sent to 5 rue keller, in order to expell with their bare hands 70men,women,and children who had been living there in a furnished hotel for several days aheady.

This savage expulsion operation(the women were pulled by their hair into the street)took place while the husbands were at work.

It was "thanks"to a denunciation by EDF(the national electricity compagny) that the onner of the hotel learned of the popular appropriation of"his property".Unfortunately for this onner,the people who were expelled were not isolated,and a few hows after the expulsion,tens of militant squatters showed up atrue kellerto bring their support,and Emmaus(a humanitarian agency)donated two truck worth of mattress and covers:The night was to be cold and long.On friday morning we set up a petition table in order to test the population of that less and less popular (plebeium)district,the Bastille.the results of this propaganda test were excellent,people signed the petition for support ,game money and clothes etc.....

During this time ten meters away,about I5 C.R.S.(riot police)wagons took up positions around the street.Towards the begining of the afternoon , still on friday the 6th ,4 mercenaries took possession of the hotel.

The situation because more and more tense(from the window of the 1st floor,on of the militia-man threatened the crowd with an iron bar)when 3 other mercenaries came to fetch their colleaguesThis was done under a volley of insult while they were retreating,one of them took out a switchblade and tried to knife one of our camrades,while another took out a nunchaku.Several iron bars flew at them and they ran off.They were taken in by the cops but of course released the next day.

After this provocation,the higher-ranked cops who were in charge of the affair got the C.R.S.(riot police)to move in....We decided to camp out one night more,and Emmaus(charity) brought us a tent ,but before we finished setting it up (it was about 6 pm)the cops set their C.R.S. in to motion to get us out of the street.It was hot!after some discution the march of the C.R.S. was stopped because new decisions had come from above.At 8 pm,the C.R.S. back tracked,climbed into their vans and went back to where they had come from.We had won.The prefect(district authority) had ordered the reintegration of the home for cause illegal expulsion.In fact ,the decision was political ,because the people who had been expelled were determined to struggle until the end of their possibilities,the propaganda had worked well.All the media had a part in it the national TV channels and news papers

Presently the hotel is occupied by Africans mainly,and some Europeans (126 peoples).The trial came soon,on monday Oct. 9,proceedings were set for Oct. 10,,and expulsion ordered for Oct.20, but the winter law had just been voted for Oct. 16 .So the occupants should have until March 31, 1990.

Prisonner's struggles are coming up continually against government repression, aiming at shuting their voices, squash and deprive them of their responsabilities, in the silence and far away from the look of the outside world. That's why, we're asserting the necessity to spread informations about jail's reality, and the struggles which ar developating in it, because prison, more than anyplace else, is a space of social organisation, cut off from the reality. Place where today (at least concerning france), mor than anywhere else, (factories, districts, schools...and so on) prisonners're fighting, organising themselves, co-ordinating themselves, and express their belonging to the dynamic of struggle's movement of the working class.

Outside, to break this silence, struggle's collectif supporting prisonners, were create in many towns and countrys, denouncing and fighting, trough prisonners revendications, the reality of jail's world. The CUSPEL (united collectif of solidarity with fighting prisonners) are estimating that today, in the moment where prisonners struggle, (whatever they're political or social), tend to be one of the central points in the contradictions of the repressiv power, it's necessary to connect, co-ordonnate all those struggle points (interior as exterior). WE have to strenghten the circulation of the activ information, either inturnal of the prisons, either interior/exterior and allow that the prisonner's struggle against jail reality, are mixing between themselves and with social reality too.

Concretly, as the jails are geographicaly expoded, we propose you to formalise a system of exchange and circulation of informations that anyone can take in their own are to transmit them at the whole social group, either by the way of tracts, posters, and so either of actions ofsolidarity in an autonomous way and/or co-ordonnated.

To an international and european level, in the restructuration context of repressivs politics, we propose you too, in a first time, an informations exchange. All this in order to create a link in the futur, between prisonners struggle, as well as between themselves than with the outside, co-ordonnate a struggle movment suporting those ones.

But otherwise, from now on, seeing our capacities, express our solidarity. In this state of mind, we seize the opportunity of the autonomous transnational meetings, for a first contact, and a debate meeting, based on the situation of jail's struggles in France.

Anyway the G.I.C. is the central agency for phone earing and control(after the home office , the ministry of Army and the ministry of communication have accepted the request). The GIC has been created in 1960, during the Algerian war, by Michel Debré.

EVERY CENSUS TAKER IS A COP !

90 census began in early march. In the sametime people discovered R. (political police) computerized card-index. What a chance we know no how they gonna eat us.

"Census is a kind of meeting between people" control for cops too; pa pers, TV, ads repeat all days long that census got no risk, that ever precautions have been taken: you don't have to worry. Too much polite to be honnest. What does it mean? Census would be anonymous. But, we never know what become these formularies(name, first name, adress), what will be done with them. They are filed, computerised intown hall that's sure. This census would be useful to know the next industrial commercial needs. Where do they think they are?;their coarseness got limits. We work(not to much),we buy(sometime), they collect. Never m theirs problems.They have to extricate themselves. This pseudo-scanda with RG. cards index gave us a few funny scenes. We have seen SOS Ra (an anti racist state syndicat) discover,at last, that RG 've got a index. What a discovery! They need an article in a new paper(Canard chainé) to discover what everybody know :RG exist, they've got a car index, computerized since 82. But cops too and DST(the secret servi and the police militia. Some people will find completly normal some poor (squatters,delinquents,...) to be card indexed.

Because of watching too much TV, they call terrorist people which cri is to be rebel.

RG Terrorist card index would have 70000 names.

IN Marseille is tested a regional card index(70000 names) against sma delinquency called "Morpho système".It well be soon used in whole Fra We have pleasure to be not so isolated. But those who enjoy good poli functioning can also be worry of it."French people ask for more secu There is a price for this security" Rocard (first ministre). The pri to pay for this protection (= rackett) is the all population card ind xing. Over and above this "terrorism" card index,RG've got a 370000 card-index with people judged politicaly, economicaly, socialy import (rearly anything and anybody), and a 600000 cards manual with associa and persons.

The CNIL(national commission for information and liberties) watch ov these card index and census. CNIL would have many powers. We have see piece of it, when Rocard decided, without taking an advice of CNIL, t take back RG order in concil. Slaves will ever be treated like slaves. Without care...

They tell us ,it's late, I'm tired, we have to eat tomorrow. So we an

THEY MAKE FUN OF US .THEY WON'T DO IT FOR A LONG TIME . FUCK COPS.
